Varied	South West	C0000772	2471	Murray Darling Basin Authority	Lake Victoria Operation	Lake Victoria	Wentworth		4/08/2015	7/08/2015		A Section 87 Permit and a Section 90 Consent were issued to the Murray Darling Basin Commission (now Murray Darling Basin Authority, MDBA) for the operation of Lake Victoria on 27th August 1998 for an eight year period. The Section 90 Consent was modified under appeal and re-issued on 27th May 2002. A combined Section 87 Permit and Section 90 Consent (AHIP No. 2471) was issued on the 4th August 2006 for eight years, and expired 4th August 2014. An interim AHIP extension was issued at this time by OEH for twelve months to 4th August 2015, which included minor updating variations to parts of the AHIP (such as names of agencies). Therefore an extension of the current AHIP is now required. The variation now sought by MDBA (the proponent), seeks to extend the AHIP from 4th August 2015 through to 4th August 2020. This will facilitate Lake Victoria operation as a strategically important water storage supplying SA through the next five years in a manner compliant with NSW legislated requirements. It is expected that the five year term will allow the finalisation of current processes to resolve impacts of salinisation arising from the operation of the Lake on surrounding lands. It is anticipated that at the end of this period an application for a new AHIP will be lodged and that any future impacts on Aboriginal objects in the subject area will be considered under the prevailing legislative requirements at that time. In addition to extension of the term of the AHIP, the proponent has requested a number of variations to its conditions. Most of these are minor in nature and involve updating current agency names, re-organising the contents of the AHIP, minor rewording of conditions for greater clarity and the addition of conditions to capture changes that have occurred since the last AHIP (care agreement, new standardised AHIP contents etc.). The proponent does not seek expansion of the area covered by the AHIP, nor is it to cause additional harm to the environment or Aboriginal objects, and the proponent's intent is not to alter the operating strategy of the Lake as a reservoir.
