

**Table 2 – Species still under assessment**

The following table lists those species which are at various stages in the assessment process. For completeness, they have been included in the summary tables attached to this report with advice on the Committee’s preliminary view on their assessment. As the Committee is awaiting information either from submissions or from other sources and that information is yet to be considered, the final decision of the Committee may vary from that shown in the tables accompanying this report.

Species	Current position
<i>Calamanthus fuliginosus sensu stricto</i>	The Committee made a preliminary determination to support listing this subspecies as an Endangered species. The Committee’s assessment on whether this species meets the criteria for listing will be finalised in early 2010.
<i>Dasyornis brachypterus monoides</i> , Eastern Bristlebird (northern subspecies)	The Committee made a preliminary determination to support listing this subspecies as an endangered species. The Committee is awaiting advice on genetic research into the populations of the Eastern Bristlebird.
<i>Dasyornis brachypterus brachypterus</i> , Eastern Bristlebird (southern subspecies)	The Committee made a preliminary determination to support listing this subspecies as a critically endangered species. The Committee is awaiting advice on genetic research into the populations of the Eastern Bristlebird.
<i>Haemotopus longirostris</i> , Pied Oystercatcher	The Committee made a preliminary determination to support listing this subspecies as a vulnerable species. The Committee’s assessment on whether this species meets the criteria for listing will be finalised in early 2010.
<i>Haloragis exalata</i> subsp. <i>exalata</i>	The Committee made a preliminary determination to support the delisting of this species. The Committee is awaiting advice on the identification of one of the populations of this species.
<i>Pomaderris delicata</i>	The Committee has made a preliminary determination to support listing this species as a critically endangered species. The Committee’s assessment on whether this species meets the criteria for listing will be finalised in early 2010.
<i>Pomaderris reperta</i>	The Committee has made a preliminary determination to support listing this species as a critically endangered species. The Committee’s assessment on whether this species meets the criteria for listing will be finalised in early 2010.
<i>Underwoodisaurus sphyrurus</i> , Border Thick-tailed Gecko	The Committee made a preliminary determination to support the delisting of this species. The Committee’s assessment on whether this species no longer meets the criteria for listing will be finalised in early 2010.
